DETAILED ACTION

Allowable Subject Matter

Claims 8-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 8, the prior art of record does not disclose, and would not suggest to one of ordinary skill in the art at the time of invention, the step of subtracting a frequency shifted total signal from a *first* microphone from the detected total signal of a *second* microphone, and *vice versa*. While it is well known in the art that frequency shifting reduces feedback in when microphones and loudspeakers are in close proximity, the input of a first microphone is typically frequency shifted before being output on a loudspeaker corresponding to that microphone. The prior art of record provides no suggestion for using the frequency shifted signal of a first microphone associated with a first speaker to subtractively superimpose the total signal of a second microphone and vice versa.

Claims 9-12 further limit claim 8 and thus are allowable.

Regarding claim 13, similar to claim 8, the prior art of record does not disclose, and would not suggest to one of ordinary skill in the art at the time of invention, subtractively superimposing a parallelly tapped loudspeaker signal (the loudspeaker signal of a particular section receiving the frequency shifted total signal from a second section's corresponding microphone) and the microphone signal of the respective subsection.

Claims 14-17 further limit claim 13 and thus are allowable.

Claims 18-21 are allowed for the reasons indicated in the previous Office Action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
